

MEDITRACK SYSTEM

TSI ENGINEERING SDN BHD

AN EBUSGAD

TSI Engineering Sdn Bhd was formed in 1993 to provide a selected range of specialised building products to the Malaysian building industry and support the expanding business activities of its parent company, TSI Group Malaysia.

TSI Engineering has developed a comprehensive range of surface protection systems for the hospital industry, schools, airports, colleges, hotels and universities.

The company is also a leading specialist in health care installations with extensive experience in manufacturing and fitting cubicle curtain tracks under the brand name – Meditrack.

The Meditrack Cubicle Curtain Track System and I.V. System are used widely in hospital wards, health centres, surgery rooms and other health care facilities today.

TSI Engineering works closely as team to design, specify, manufacture and market its Meditrack system. The company has a dedicated team of professionals with significant experience in undertaking site surveys and on site project management, ensuring that the project runs smoothly from start to finish.

To remain the leading company in its field, TSI Engineering will constantly invest in research and development to improve its existing range of products as well as in new manufacturing facilities and quality control systems.

In line with the objective, the company has expanded its distribution network overseas to include UAE, Saudi, India, Bangladesh, Kuwait, Thailand, Indonesia, Singapore, Philippines, Vietnam, and other countries.
